

# **ECONOMIC INDICATORS** QUEENSLAND

EMBARGOED UNTIL 11:30AM FRI 26 MAY 1995

## **MAY KEY POINTS**

### **AUSTRALIA**

#### **BALANCE ON CURRENT ACCOUNT**

- The trend estimate of the current account deficit increased \$34m to \$2 277m from February 1995 to March 1995.

#### **MERCHANDISE IMPORTS**

- The trend estimate of merchandise imports was \$6 418m in March 1995, increasing \$92m from February 1995 and 18.9% from March 1994.

#### **ARTICLES PRODUCED IN MANUFACTURING INDUSTRY**

- The price index for articles produced by manufacturing industry, all groups, was 119.1 for February 1995, increasing 3.7% from February 1994.

### **QUEENSLAND**

#### **LABOUR FORCE**

- The trend estimate of total employed persons continued to grow, increasing 9 200 from March 1995 to 1 508 800 persons in April 1995. Total employed persons in trend estimate terms increased 6.4% from April 1994 to April 1995.
- The trend estimate unemployment rate for total persons for April 1995 was 8.6% for the third consecutive month.

#### **BUILDING APPROVALS**

- Total dwelling units approved in trend estimate terms decreased to 3 104 in March 1995, decreasing 5.1% from February 1995 and decreasing 32.3% from March 1994.

#### **RETAIL TRADE**

- Retail trade turnover in trend estimate terms continues to record steady growth, reaching \$1 728.6m in March 1995, an increase of 7.6% from March 1994.

## **INQUIRIES**

- For further information about these and related statistics, contact Information Inquiries on 07 222 6351, or any ABS office.

## CHANGES IN THIS ISSUE

In this publication, the ABS has chosen to focus on trend estimates as the best means of discerning the underlying behaviour in the time series.

Due to changes in collection methodology, selected production series for ready-mixed concrete, electricity generated, clay bricks, beef and veal and wheaten flour are no longer included in Table 3, page 9 of this publication. Some of these series continue to be available as a special data service and can be obtained by contacting Information Inquiries on (07) 222 6351.

The series for mineral production and mineral exploration have been moved from page 8 to page 9.

R.A. CROCKETT

DEPUTY COMMONWEALTH STATISTICIAN

## MAIN FEATURES

### COMPANY PROFITS, AUSTRALIA

Australia's company profits in trend estimate terms rose to \$4 712.3m in June quarter 1989 after a period of strong growth. Following the 1988 stockmarket crash, company profits fell sharply to \$2 575.3m in June quarter 1991, but have since recovered, reaching \$6 526.0m in December quarter 1994.

### CONSUMER PRICE INDEX, BRISBANE, ALL GROUPS

The all groups Brisbane consumer price index for March 1995 was 115.8, an increase of 1.8% over December quarter 1994 and 4.5% over March quarter 1994. The index for the housing group increased 8.9% from March quarter 1994 to March quarter 1995. The index for the food group increased 2.6% from March quarter 1994 to March quarter 1995.

### VALUE OF ALL DWELLING UNITS COMMENCED

Queensland's value of all dwelling units commenced decreased \$225m from \$1 364m in September quarter 1994 to \$1 139m in December quarter 1994. The value of all dwelling units commenced increased 1.6% from December quarter 1993 to December quarter 1994. The number of new houses commenced in December quarter 1994 was 8 787, a decrease of 899 from September quarter 1994.

# EXPLANATORY NOTES

## INTRODUCTION

**1** This publication contains latest estimates for a comprehensive range of economic indicators. Statistics shown in this publication are the latest available at the date of preparation and may be subject to revision in subsequent issues. In a number of cases figures appearing in this publication are preliminary and are subject to revision in subsequent issues. Reference should therefore always be made to the latest issue or to the statistical publication on the specific subject.

## SEASONAL ADJUSTMENT AND TREND ESTIMATION

**2** Seasonal adjustment is a means of removing the estimated effects of normal seasonal variation from the series so that the effects of other influences on the series can be more clearly recognised. Seasonal adjustment does not aim to remove the irregular or non-seasonal influences which may be present in any particular month. This means that month-to-month movements of the seasonally adjusted estimates may not be reliable indicators of trend behaviour.

**3** The smoothing of seasonally adjusted series reduces the impact of the irregular components of the seasonally adjusted series and creates trend estimates. These trend estimates are derived by applying a 13-term Henderson-weighted moving average to all months except the last six. The last six monthly trend estimates are obtained by applying surrogates of the Henderson average to the seasonally adjusted series. Trend series are used to analyse the underlying behaviour of the series over time.

**4** While this smoothing technique enables estimates to be produced for the latest month, it does result in revisions to the most recent months as additional observations become available. Generally, subsequent revisions become smaller and after 3 months have a negligible impact on the series. Revisions also occur as a result of the annual review of seasonal factors.

**5** Users may wish to refer to the ABS Publication: *A Guide to Interpreting Time Series – Monitoring 'Trends' – An Overview* (1348.0) for more detailed information on smoothing seasonally adjusted time series data.

## COMPOSITE LEADING INDICATOR

**6** The CLI is calculated as a simple average of the short-medium term movements in eight indicators. On average during the 1970's and 1980's, the CLI led turning points in the GDP(A) growth cycle by around two quarters, but the lead time for individual peaks and troughs varied considerably. Expansions and slow downs in activity are measured relative to the historical long-term trend; thus *peaks and troughs in the CLI provide early signals of turning points in the growth cycle*, not signals of recessions and recoveries.

## RELATED PUBLICATIONS

**7** Current publications produced by the ABS are listed in the *Catalogue of Publications and Products* (1101.0). The ABS also issues, on Tuesdays and Fridays, the *Publications Advice* (1105.0) which lists publications to be released in the next few days. The *Catalogue* and *Publications Advice* are available from any ABS office.

## UNPUBLISHED STATISTICS

**8** As well as the statistics included in this and related publications, the ABS may have other relevant unpublished data available. Inquiries should be made to Information Inquiries on (07) 222 6351 or to any ABS office.

## EFFECTS OF ROUNDING

**9** Estimates have been rounded and discrepancies may occur between totals and sums of the component items.

## FOR MORE INFORMATION . . .

The ABS publishes a wide range of information on Australia's economic and social conditions. A catalogue of publications and products is available from any of our offices (see below).

### INFORMATION CONSULTANCY SERVICES

Special tables or in-depth data investigations are provided by the ABS Information Consultancy Service in each of our offices (see below).

### ELECTRONIC DATA SERVICES

A large range of data is available via on-line services, diskette, magnetic tape, tape cartridge and CD ROM. For more details about our electronic data services, contact any ABS office (see below).

### BOOKSHOP AND SUBSCRIPTIONS

There is a large number of ABS publications available from the ABS Bookshops in each of our offices. You can also receive any of our publications on a regular basis. Join our subscription mailing service and have your publications mailed to you in Australia at no additional cost. Telephone our Publications Subscription Service toll free Australia wide on 008 0206 08.
